

EasiVis

Electronic Visitor Book

IDentity Solutions' EasiVis range of Visitor Badge Production Software is the most user-friendly system currently available. With its button-driven data entry screen and powerful badge designer, it provides an ease-of-use and flexibility unmatched by its competitors.

EasiVis is a Windows based package, which allows for the registration of Visitors and production of Badges in an instant. It also has the ability to capture and store Visitor Photos along with visit details.

EasiVis allows for multiple BADGE and REPORT templates to be designed and stored.

EasiVis includes the option to email staff when a visitor logs in and the Professional edition has an optional pre-booking module available.

EasiVis supports ISO Magnetic Stripe encoding and barcoding as standard. It has the ability to print to any Windows driven printer including Plastic Card Printers.

With images typically saving at less than 15K per image, EasiVis requires approximately only 90Mb of Hard Disk Space per 10,000 records.

No longer are you limited to an off-the-shelf product, as IDentity Solutions' EasiVis can be easily developed to suit your individual requirements.
